Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)			
Office Action Summan	09/941,857	MONTEBOVI, FRANCO			
Office Action Summary	Examiner	Art Unit			
	Gerald Gauthier	2614			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 09 Ap	oril 2007.

DETAILED ACTION

Election/Restrictions

A complete reply to the rejection must include cancellation of nonelected claim
 or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claim(s) 12, 13 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Ishigaki (US 2001/0017855 A1).

Regarding **claim(s)** 12, Ishigaki discloses a method of operating a browser in a mobile telecommunications device, including operating an individual key of the device in a first mode to navigate between previously visited pages, operating the individual key in a second mode to provide a display of previously visited homepages and selecting one of the pages from the display of previously visited homepages to navigate directly thereto (paragraph 0096).

Application/Control Number: 09/941,857 Page 3

Art Unit: 2614

Regarding **claim(s)** 13, Ishigaki discloses a mobile telecommunications device including a browser to navigate between different network addresses and display information therefrom, and a key operable in a first mode to navigate between previously visited network addresses and operable in a second mode to provide a display of previously visited homepages whereby to permit the user to select a homepage from the previously visited homepages display and navigate directly thereto (paragraph 0096).

Regarding **claim(s) 14**, Ishigaki discloses a device including a key to scroll a focus region between suitable menu options displayed on the browser, to permit navigation between different network addresses (paragraph 0096).

Regarding **claim(s) 15**, Ishigaki discloses a method, wherein the first mode includes pressing the key for a first period of time and the second mode includes pressing the key for a second period of time, the second period of time greater than the first period of time (paragraph 0096).

Application/Control Number: 09/941,857 Page 4

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 6. Claim(s) 1-9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smethers (US 6,463,304 B2) in view of Ishiqaki (US 2001/0017855 A1).

Regarding **claim(s) 1**, Smethers discloses a mobile telecommunications device including a housing, a microphone, an earpiece, a display screen mounted in the housing, a plurality of keys mounted on the housing and individually depressible by a user for performing telephony operations, radio circuitry, and a processor operable to provide a browser for navigating between different pages stored remotely of the mobile telecommunication device and displaying information therefrom on the display screen (FIG. 3A-3C and column 5, line 61 to column 6, line 50).

Smethers fails to disclose an individual key of said plurality of keys is operable in a first mode comprising a first user depression sequence pattern of said individual key to navigate between previously visited pages.

However, Ishigaki teaches wherein an individual key of said plurality of keys is operable in a first mode comprising a first user depression sequence pattern of said individual key to navigate between previously visited pages and said individual key further being operable in a second mode comprising a second user depression sequence pattern of said individual key to provide a display of previously visited pages whereby to permit the user to select a page from the display of previously visited pages and navigate directly thereto (paragraphs 0096).

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the invention of Smethers using the teaching of viewing recently viewed pages as taught by Ishigaki.

This modification of the invention enables the system to have an individual key of said plurality of keys is operable in a first mode comprising a first user depression sequence pattern of said individual key to navigate between previously visited pages so that the user would have the advantage of seeing previous data.

Regarding **claim(s) 2**, Smethers discloses a device, wherein the key is operable to navigate backwards through previously visited pages (column 4, lines 1-13).

Art Unit: 2614

Regarding **claim(s) 3**, Smethers discloses a device, wherein the key is operable to navigate forwardly through previously visited pages (column 4, lines 1-13).

Regarding **claim(s) 4**, Smethers discloses a device, wherein the first and second modes are selected by operating the key for relatively shorter and longer periods respectively (column 4, lines 19-41).

Regarding **claim(s) 5**, Smethers discloses a device, including a scrolling key operable to scroll a focus region through the display of previously visited pages for selecting one of the pages (column 6, lines 23-30).

Regarding **claim(s) 6**, Smethers discloses a device, including a further key for selecting a page from the previously visited pages display and so as to navigate directly then to (column 4, lines 19-41).

Regarding **claim(s) 7**, Smethers discloses a device and comprising a mobile telephone handset (column 3, lines 22-35).

Regarding **claim(s) 8**, Smethers discloses a device and comprising a PDA (column 3, lines 22-35).

Regarding **claim(s) 9**, Smethers discloses a device, wherein the display of the previously visited pages comprising a display of the previously visited pages whereby to permit the user to select one of the previously visited pages and navigate directly thereto (column 6, lines 23-30).

Regarding **claim(s) 11**, Smethers discloses a device, which is WAP enabled (column 3, lines 22-35).

Response to Arguments

7. Applicant's arguments with respect to **claim(s)** 1-9 and 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald Gauthier whose telephone number is (571) 272-7539. The examiner can normally be reached on 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
